

Global Power M&A

MODULE UPDATE

Evaluate Energy’s M&A database has expanded to include all global power deals. Data includes all renewable forms of energy as well as coal, gas and nuclear since October 2016. It is an essential tool to stay up-to-date with today’s fast-evolving energy landscape.

DATA HIGHLIGHTS

- Full Financial Consideration Breakdown for Each Deal
- Deals Include Integrated Energy Providers and Pure-Play Renewable Projects
 - Wind, Solar, Tidal, Hydro, Biomass, Landfill
- Granular Geographic Information
- MW Capacity
- \$ Cost per MW Acquired
- Stage of Plant Development
- Full Data Transparency and Sourcing

INTENDED USERS

- Power and Integrated Energy Companies
- Business Analysts

KEY USER BENEFITS

Pinpoint all renewable M&A activity

Benchmark how acquisition costs differ by power, type and region

Track who is actively diversifying their portfolio

Stay informed of every deal as it happens

Forecast future shifts in the energy mix
